

# Pallet Stacking Station PSS

Collect and stack perfectly

The pallet stacking station PSS is the ideal device for storing pallets according to their size and use as well as stacking replaced ones securely on minimal floor space after the exchange. Just like the changing station, the stacking station is manufactured in the formats EURO, INDUSTRY as well as CUSTOM. A solidly welded ramming protection secures the back corners.

## Pallet stacking station, here Type PSS-11 EURO

Specifications/technical data

	without pallet	with pallet
Length mm	998	1256
Width mm	1017*	1017*
Inner width	820*	820*
Height mm	1387	1486***
Ramming protection mm		5
Weight kg		110**
Number of screw holes		12
Hole width mm		12.5
Material PSS-11		Sheet steel DC01 (Grade A) EN10130
Thickness mm		3

## Technical data

Custom-made for the individual pallet system

SW-Paratus offers the stacking station PSS in different sizes exactly aligned with EURO, industrial, one-way or half-format pallets. Additional tailor-made sizes upon request.

Consisting of three units/parts:

2 side walls, 1 back wall

Assembly is carried out on site with six galvanized M10 nuts and bolts (enclosed)

Attachment to the floor on site via the screw holes (use appropriate, approved floor anchors, for example, anchor bolts or Express anchors in the case of concrete; if necessary ask structural engineer.)

\* with INDUSTRY inner and outer width, add + 200 mm each  
 \*\* with INDUSTRY weight add + 7 kg each  
 \*\*\* depending on the type of pallet and height

## Workmanship “Made in Germany”

The pallet stacking station helps stack pallets in an orderly fashion (according to size, here for width = 800 mm), to create order (for safety as well as visual reasons) and to guarantee speedy usage of the pallet sliding device. The PSS can be used as a dispensing as well as a collecting unit.

## Powder coating, surface smooth, shiny

Polyester powder for outdoor use (suitable for facades), partly impact-resistant, fade resistant (weather and UV resistant)

- Colors**
- RAL 5012 light blue
  - RAL 6000 patina green
  - RAL 7016 anthracite grey
  - RAL 7035 light grey
  - Other RAL-colors available at an additional charge (Approx 10%)

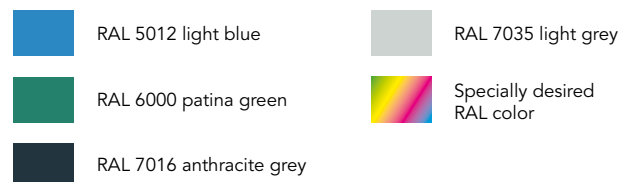

## Initial operation and use

- Before every operation/use, the station and its anchoring must be visually checked
- The device may only be used by trained and authorized personnel.
- Before using, the operator must make sure there is no one in the immediate danger zone.
- You are only allowed to use approved, undamaged pallets to avoid damage to the station.
- The pallet stacking station does not require regular maintenance. The operability and stability must be tested regularly.

## Pallet stacking station models

Art. no.	Model name	Color
1021000	PSS-01 – EURO Standard	RAL 5012 light blue
1021001	PSS-01 – EURO Standard	RAL 6000 patina green
1021002	PSS-01 – EURO Standard	RAL 7016 anthracite grey
1021003	PSS-01 – EURO Standard	RAL 7035 light grey
1021004	PSS-01 – EURO Standard	RAL Sonderfarbe
1021005	PSS-02 – INDUSTRY Standard	RAL 5012 light blue
1021006	PSS-02 – INDUSTRY Standard	RAL 6000 patina green
1021007	PSS-02 – INDUSTRY Standard	RAL 7016 anthracite grey
1021008	PSS-02 – INDUSTRY Standard	RAL 7035 light grey
1021009	PSS-02 – INDUSTRY Standard	Specially desired RAL color
1021999	PSS-03 – CUSTOM Special measurements	Specially desired RAL color

### Optional

Execution in stainless steel for hygienically sensitive areas and food production
